

Indoor & Container Gardening

Create a Container Garden

Scotts Miracle-Gro

Project Difficulty

1 (1 of 5)

Containers Are Great for Small Spaces

You can turn small spaces like patios, balconies, and porches into beautiful retreats with container gardens. It's easy to do when you follow some simple steps.

Project Steps:

1 Choose the plants and containers for your space

Pick containers that can handle the size of the plants you're considering. You can contrast large containers and plants with small ones for a stunning effect. Just make sure that the containers you choose have drainage holes. Annual plants and bulbs are popular choices for containers. Get ideas from this site, check plant tags or ask your local garden center for ideas.

2 Plant

Fill your containers with high-quality potting soils, such as Miracle-Gro® Potting Mix or Miracle-Gro® Moisture Control Potting Mix. Make sure you only fill to about three inches from the top. Dig out space for one plant at a time.

3 Water

Once the plants are in, gently water until you see water coming out of the drainage hole.

4 Arrange Them

Now it's time to move your containers and create your look. Mix large containers with small ones, in groupings. Try hanging containers, pot stands, and railing boxes for added interest.

Water

Water at least once a day at the base of the plant. Water twice a day during extremely hot or dry weather.

Feed

Feed every other week with Miracle-Gro® LiquaFeed® Ready-To-Use Plant Food.

WHAT YOU'LL NEED:

Miracle-Gro® Potting Mix

Miracle-Gro® LiquaFeed®

Ready-To-Use Plant Feeder

Miracle-Gro® LiquaFeed® Plant

Food Refill Bottles

Miracle-Gro® Liquid All Purpose Plant Food

Plants, Herbs, or Vegetables

Container

Trowel

Mulch

Hose or Watering Can
